Effects of this medicine

This medicine shows anti-inflammatory, analgesic and antipyretic action by blocking cyclooxygenase to suppress biosynthesis of prostaglandin involving in inflammation.

It is usually used for analgesia and anti-inflammation in rheumatoid arthritis, osteoarthritis, low back pain, shoulder peri-arthritis, cervico-omo-brachial syndrome, toothache, after a surgery, an injury and a tooth removal, and pyretolysis and analgesia in acute upper respiratory inflammation.

Before using this medicine, be sure to tell your doctor and pharmacist

- If you have previously experienced any allergic reactions (itch, rash etc.) to any medicines.
If you have: peptic ulcer, blood abnormality, hepatic disorder, renal disorder, heart dysfunction, aspirin-induced asthma, or its history.
- If you are pregnant or breastfeeding.
- If you are taking any other medicinal products. (Some medicines may interact to enhance or diminish medicinal effects. Beware of over-the-counter medicines and dietary supplements as well as other prescription medicines.)

Dosing schedule (How to take this medicine)

- Your dosing schedule prescribed by your doctor is((to be written by a healthcare professional))
- For rheumatoid arthritis, osteoarthritis, low back pain, shoulder peri-arthritis, cervico-omo-brachial syndrome, toothache, after a surgery, an injury, and a tooth removal : In general, for adults, take 1 tablet (60 mg of the active ingredient anhydride) at a time, 3 times daily. If you take the medicine as needed, take 1 to 2 tablets (60 to 120 mg). The dosage may be adjusted according to the age or symptoms.
For acute upper respiratory inflammation : In general, for adults, take 1 tablet (60 mg of the active ingredient anhydride) at a time, as needed. The dosage may be adjusted according to the age or symptoms, however, it is limited to twice daily, maximum 3 tablets (180 mg) daily.
Avoid taking the medicine on an empty stomach in any case. Strictly follow the instructions.
- If you miss a dose, take a dose as soon as possible when you remember that you missed a dose. However, if it is almost time for the next dose, skip the missed dose and continue your regular dosing schedule. You should never take two doses at one time..
- If you accidentally take more than your prescribed dose, consult with your doctor or pharmacist.
- Do not stop taking this medicine unless your doctor instructs you to do so.
